

Product Overview

FFP2 particulate respirator with valve designed to protect against airborne particles, dust, and mist in industrial environments. Lightweight design with adjustable nose clip and elastic headband for secure and comfortable fit.

Certifications & Norms

EN 149:2001+A1:2009

Features

Adjustable Nose Clip

Breathable Material

Dust Protection

Secure Fit

Applications

- Construction
- Sanding
- Cement
- Textile
- Wood Work
- Grinding
- Metal Work
- Petrochemical
- Power Plant
- Painting

Technical Details

Product Description	Disposable particulate respirator with valve for protection against dust, fumes, and airborne particles.
Material Composition	Polyester Shell, Plastic Nose Clip, Elastic Headband
Weight (g / lbs)	Approx. 0.38 oz
Color / Available Colors	White
High-Visibility / Reflective Details	N/A
Size Range & Adjustment	Adjustable nose clip, elastic headband
Airflow / Ventilation Features	Exhalation valve for easy breathing
Fastening / Closure System	Dual elastic headband
Accessory & Attachment Compatibility	N/A
Performance & Protection Rating	FFP2, filters at least 94% particles
Water / Weather Resistance	N/A
User Comfort Features	Lightweight, adjustable fit, breathable design
Usage Lifespan	Shelf life 3 years from manufacture
Manufacturing Lifespan	N/A
Cleaning, Care & Storage	Store in original packing away from sunlight, dust, heat, and moisture. Temperature -30°C to +50°C.
Custom Branding Options	N/A
Packaging	20 pcs per box, 400 pcs per carton
Country of Origin	Made with globally sourced materials
